### Eco-Village

Submission for LCI Barcelona Master Scholarships **“Design for planet centered and human future”**

*Description:* Inspired by the solar punk movement, the concept of an eco-village emphasizes harmonious living with nature. It combines high-tech and low-tech sustainable solutions, including solar energy, advanced greenhouses, water reclamation systems, zero-waste transportation options, and traditional crafts. The goal is to strive towards a zero environmental footprint. Moreover, this vision includes creating small, intentional, inclusive communities that foster strong ties and a sense of belonging among their members. The emphasis is placed on creating an environment that promotes mental and physical health.

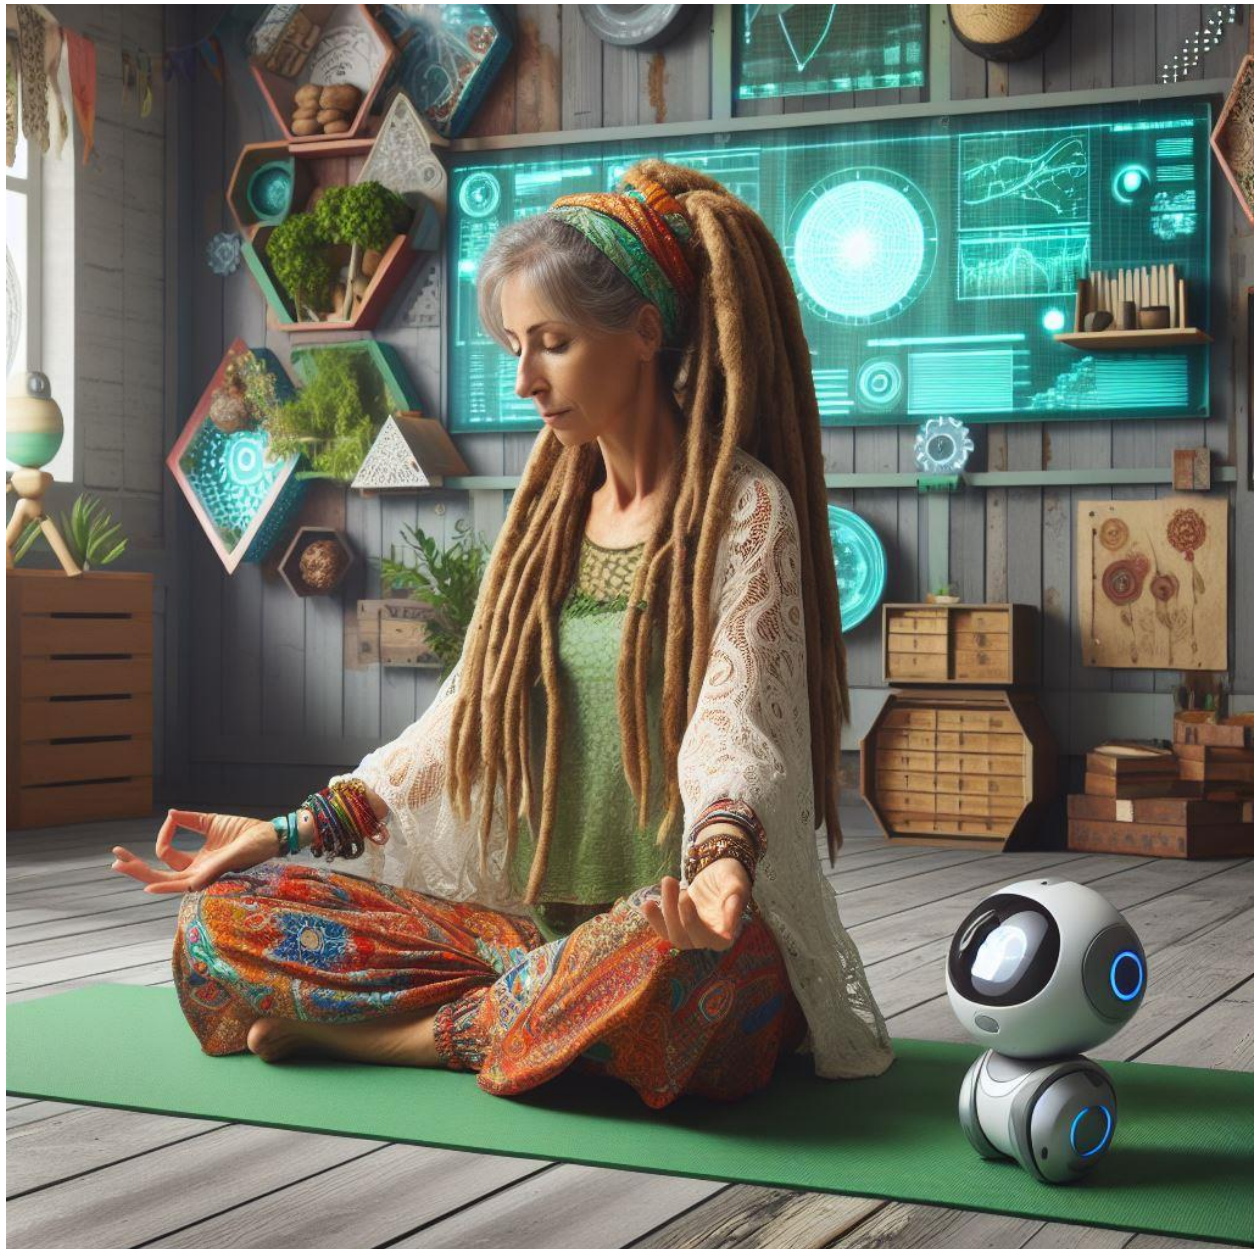

*Prompt1 (photos 1 and 2):* Solar punk village, eco-village, water reclamation systems, green energy, nature, plants, trees, community green spaces, agriculture land, lake, vegetable gardens, vertical gardens, high tech greenhouses, eco transport, small houses made of clay, high detail, 3D, stylized, futuristic, hyper-realistic, colorful, harmony, integration with nature

*Prompt2: (photo 3) A middle-aged woman with dreadlocks, wearing hippie colorful clothes, with natural patterns, green and earth tones, practicing yoga, feeling part of the surroundings and community, let's make the background of the image look futuristic and add a small robot as a companion of the woman*

*AI used: chat GPT 3.5, Copilot powered by DALL-E 3*
